

DIN Standard PN16 Ball Valve

This ball valve is designed for industrial applications requiring reliable flow control. It features a flanged connection for secure installation and a lever handle for easy operation, making it suitable for various fluids with excellent sealing performance.

Product Overview

DIN Standard PN16 Ball Valve

This DIN standard ball valve is engineered for demanding industrial environments where reliable flow control is essential. Featuring a robust flanged connection and a standard PN16 pressure rating, it ensures secure installation and long-term durability. Designed for versatility, this valve provides excellent sealing performance across a wide range of fluid applications.

Technical Specifications

Pressure Rating

1.6 Mpa
Pressure

Standards

DIN Standard

Key Features

- DIN Standard compliance
- Flanged connection for secure mounting
- Lever handle operation
- High-performance sealing

Nominal Diameter

DN50

Connection Type

Flanged

Material Composition

Stainless Steel, WCB
