Product Overview

Precision Engineering for Industrial Drilling

This DIN 338 compliant twist drill bit is crafted from high-speed steel (HSS) to deliver reliable performance in demanding environments. Featuring a fully ground flute and a bright finish, it offers excellent wear resistance and precision. The specialized 135-degree split point design ensures superior self-centering, effectively reducing walking during the start of the drilling process.

Technical Specifications

Manufacturing Standard	DIN 338
Material	HSS, HSS-CO
Surface Finish	Bright
Shank Design	Parallel

Performance Features

Point Angle

118° • 135°

Manufacturing Process

Fully ground

Applications

Suitable Materials

- Mild Steel
- Copper
- Aluminum
- Zinc Alloy
