Product Overview

Precision Threading Solutions

The DIN352 Metric Thread Tap Set is an essential tool for high-precision internal thread machining. This comprehensive three-piece set is engineered to ensure superior thread accuracy and durability through progressive cutting stages. Designed for versatility, it is suitable for both manual and machine tapping operations across a wide range of materials.

Technical Specifications

Set Composition

- Taper tap
- Second tap
- Bottoming tap

Standard	DIN352
Material	High-Speed Steel (HSS)
Suitable Operations	Manual Tapping, Machine Tapping
Pieces per Set	3
