

DIN80 12V 80Ah Automotive Battery

This DIN80 12V car battery provides reliable starting power for automotive applications. The 12V 80Ah capacity ensures long-lasting performance and consistent power output.

Overview

High-Performance Automotive Power

This 12V 80Ah automotive battery is engineered for reliable starting power and long-lasting performance in demanding vehicle applications. Featuring a maintenance-free design with advanced lead-based alloy grids, it offers superior corrosion resistance and minimal self-discharge. The reinforced container and vibration-resistant construction ensure durability, while the integrated magic eye indicator allows for quick and easy state-of-charge monitoring.

Technical Specifications

Maintenance Type

Maintenance Free

Voltage

12 V

Capacity

80 Ah

Construction & Design

Key Design Features

- Special sealed cover structure to prevent acid leakage
- Integrated flame arrestor for safety
- Advanced center lug technology
- Magic eye indicator for state monitoring
- Reinforced container for vibration resistance

Grid Technology

Expanded lead-based alloy

Separator

Enveloped separator for low electric resistance
