

DIN9021 Big Flat Washer

These DIN9021 big flat washers are designed for machinery and industrial applications. They provide a larger bearing surface for distributing load and preventing damage to fastened materials.

Product Overview

DIN9021 Big Flat Washer

These high-quality DIN9021 big flat washers are engineered for demanding machinery and industrial applications. Designed to provide a significantly larger bearing surface, they excel at distributing load effectively and preventing surface damage to fastened materials. Manufactured to meet strict DIN9021 standards, these washers ensure dimensional accuracy and reliable performance in critical fastening environments, such as textile machinery and heavy industrial equipment.

Technical Specifications

Key Features

- Large bearing surface for load distribution
- Prevents damage to fastened materials
- High dimensional accuracy
- Reliable industrial performance

Standard	DIN9021
Washer Type	Big Flat Washer
Common Applications	Machinery, Industrial Equipment, Apparel Machinery, Textile Machinery
