

Direct Drive Air Compressor with 40L Tank, 3HP

This direct drive air compressor is engineered for efficient air compression in industrial and general applications. It features a 40L tank, 3HP motor, and a robust design with wheels for portability and ease of use.

Product Overview

High-Efficiency Direct Drive Compressor

This direct drive air compressor is engineered for high rotational speed and efficient performance in a compact form factor. Designed with a 40L tank and a powerful 3HP motor, it offers a quick air-up time and reliable operation. Its lightweight construction and integrated wheels make it an ideal solution for both stationary industrial use and mobile applications requiring portability.

Technical Specifications

Power Output

2.2 kW

Power (KW)

3 HP

Power (HP)

Performance Metrics

Metric	Value
Max Pressure	8 Bar (115 PSI)
Air Capacity	200 L/min (7.1 C.F.M)
Rotation Speed	2880 R.P.M

Physical Dimensions	66cm (L) x 40cm (W) x 69cm (H)
Tank Capacity	40 L
Piston Configuration	47mm x 1
