

Direct Drive Computerized Lockstitch Sewing Machine

This direct drive computerized high-speed auto thread trimming lockstitch machine is designed for apparel and textile manufacturing. It features a digital control panel for precise stitch adjustments and automated functions, enhancing efficiency and productivity.

Product Overview

High-Performance Industrial Sewing

This direct drive computerized high-speed lockstitch machine is engineered for efficiency in apparel and textile manufacturing environments. It features an integrated digital control panel for precise stitch adjustments and automated functions, significantly enhancing productivity. Designed for reliable, long-term performance, this machine is an essential tool for industrial sewing operations requiring consistent, high-quality results.

Key Features

Performance Highlights

1 Lockstitch

Stitch Type

Automated Functions

Auto Thread Trimming, Computerized Control, Direct Drive System

Technical Specifications

Drive Type

Direct Drive

Model Number

FD9000-WBO

Machine Class

High-speed lockstitch
