Product Overview

High-Performance Industrial Heating

This direct-fired heater is engineered for the rapid and efficient heating of large, well-ventilated spaces such as construction sites, workshops, and agricultural buildings. Built with a robust steel housing, it offers durability for demanding environments while ensuring extended operation through a high-capacity fuel tank. Advanced safety features, including overheat protection and flame failure detection, provide reliable performance for professional use.

Technical Specifications

Safety Systems

- Overheat protection
- Flame failure detection

Portability

Wheels included • Handle included

Fuel Type

Diesel, Kerosene

Housing Material

Durable Steel

Application

Suitable Environments

- Construction sites
- Workshops
- Agricultural buildings
- Well-ventilated large spaces
