

# Directional Infrared Heater

This infrared heater provides efficient, directional heating. It features a protected heating element within a modern housing, suitable for indoor or outdoor use.

## Product Overview

### Efficient Directional Heating

This directional infrared heater provides instant warmth by heating people and objects directly rather than the surrounding air. Designed with a durable anodized extruded aluminum alloy mesh, it is suitable for both indoor and outdoor environments. The unit offers a silent, environmentally friendly, and economical heating solution with a long lamp lifespan.

## Technical Specifications

### Lamp Lifespan

**5000 hrs**

Minimum Hours

**8000 hrs**

Maximum Hours

### Heating Element

Quartz tube

### Mounting Type

Wall mounted

## Features & Construction

### Key Operational Benefits

- Instant heat within seconds of switch on
- Silent operation
- Environmentally friendly
- Economical and low running costs
- High heating efficiency

### Construction Material

Anodized extruded aluminum alloy

### Usage Environment

Indoor, Outdoor
