

Directional Outdoor TV Antenna

This high-gain directional TV antenna is designed for receiving over-the-air digital television signals. It features a multi-element design and durable construction for outdoor use.

Product Overview

High-Performance Outdoor Digital Reception

This directional outdoor TV antenna is engineered for superior over-the-air digital television signal acquisition. Featuring a sophisticated multi-element design, it incorporates reflectors, directors, and a driven element to maximize signal strength and clarity. Built for durability, the antenna is weather-resistant and designed to handle outdoor environmental demands while providing reliable coverage for both VHF and UHF frequency bands.

Technical Specifications

Supported Frequency Bands	VHF, UHF
Design Type	Multi-element directional
Weather Resistance	Yes

Installation

Mounting Options

- Mast mount compatible
- Rooftop installation hardware included
