

Disc and Belt Sander for Woodworking

This disc and belt sander is a versatile power tool designed for sanding and shaping wood and other materials. It features a rotating disc for flat surface sanding and a moving belt for edge and contour sanding.

Product Overview

Professional Woodworking Sander

This dual-function disc and belt sander is engineered for high-precision woodworking and material shaping. Featuring both a rotating sanding disc for flat surfaces and an integrated belt for contouring, it provides exceptional versatility for professional workshops. The robust, heavy-duty construction ensures long-term stability, while the inclusion of adjustable tables and fences allows for precise angle and depth control during complex projects.

Technical Specifications

Control Features

- Adjustable work tables
- Integrated fences
- Precise depth control
- Angle adjustment mechanisms

Sanding Capabilities

Flat Surface Sanding, Edge Sanding, Contour Shaping
