## Product Overview

### High-Performance Soil Tillage Discs

These professional-grade disc blades are engineered for optimal soil penetration, efficient tilling, and effective crop residue management. Constructed from high-quality 65Mn spring steel, they offer exceptional durability and resistance to wear and tear in demanding field conditions. With a versatile range of sizes and thicknesses, these blades are precision-manufactured to ensure consistent performance across various agricultural applications, including plowing and harrowing.

## Technical Specifications

### Diameter Range

**254 mm**

Minimum Diameter

**810 mm**

Maximum Diameter

### Thickness Range

**3 mm**

Minimum Thickness

**12 mm**

Maximum Thickness

### Material

65Mn Spring Steel

## Manufacturing & Capacity

### Annual Output

200000 pcs

### Customization

Yes

### Customization Details

Available according to customer drawings and samples

## Market Reach

Export Markets

UK, USA, France, Australia, South Africa
