

Disc Plow for Tillage

The disc plow is designed for tillage on cultivated or fallow land, especially high yield's manure and virgin land. It features good passability and penetration for complete inversion and coverage.

Overview

High-Performance Tillage Solution

The 1LY series disc plow is engineered for efficient plowing in both cultivated and fallow fields, performing exceptionally well in high-yield manure lands and stubble fields. Its design ensures small resistance and easy operation, making it an ideal choice for terraces, small plots, and challenging dry land or wasteland conditions. This versatile implement provides reliable soil preparation with a focus on durability and ease of use for professional farming operations.

Key Features

- Low operating resistance
- Easy operation and maintenance
- High-quality plowing performance
- Versatile for small and large plots

Suitable Applications

Cultivated Land, Fallow Fields, Wheat Stubble, Rice Stubble, Dry Land, Wasteland, Terraces

Key Performance

Performance Metrics

1.5 m

Max Working Width

300 mm

Max Working Depth

160 hp

Max Matched Power
