

Dish Mount Digital TV Antenna

This dish mount digital TV antenna is designed for receiving over-the-air TV signals. It features a weather-resistant design suitable for outdoor installation.

Product Overview

High-Performance Digital TV Reception

This dish-mount digital TV antenna is engineered for reliable signal reception, supporting both analog and digital TV broadcasts. Featuring a built-in high-gain, low-noise preamplifier and an integrated dipole, it ensures excellent signal clarity for various digital terrestrial signals. Designed with an anti-UV coating and a waterproof construction, this unit provides durable, long-lasting performance for outdoor environments.

Technical Specifications

Key Features

- Anti-UV coating
- Waterproof design
- Built-in high gain preamplifier
- Low noise preamplifier
- Integrated dipole

Signal Compatibility

Analog, Digital, HDTV, Terrestrial

Reception Characteristics

Omni-directional

Physical Dimensions

Antenna Diameter

0.71 m
