

Dishwasher Circulation Motor

This is a replacement dishwasher motor. It features a robust impeller for efficient water circulation and drainage.

Product Overview

High-Efficiency Circulation Motor

The XD Series dishwasher circulation motor is a premium replacement component engineered for optimal water flow and drainage. Built with high-quality, durable materials, this motor ensures reliable performance and longevity under demanding operating conditions. Its design features a robust impeller and standardized plumbing interfaces for seamless integration into existing dishwasher systems.

Technical Details

Component Type	Circulation Motor
Housing Material	High-quality durable plastic
Mounting Method	Screw-secured

Application

Primary Applications

- Water circulation
- Drainage

Compatible Series	XD Series
