

Dishwashing and Disinfecting Machine

This is a combined dishwashing and disinfecting machine. It efficiently cleans and sanitizes dishes and utensils for commercial applications.

Overview

Professional Dishwashing and Disinfecting Solution

This advanced dishwashing and disinfecting machine is engineered for high-efficiency sanitation in professional environments. Designed to streamline cleaning workflows, it ensures rigorous hygiene standards are met for reusable items. Its robust construction makes it a reliable asset for facilities requiring consistent and thorough disinfecting performance.

Technical Specifications

Device Type	Dishwashing and Disinfecting Apparatus
Primary Function	Dishwashing, Disinfection
