

Dismantled Packaging Machinery

Dismantled packaging machinery parts include assorted scrap metal and discarded components. The materials show signs of rust and wear, indicating they are no longer in service.

Product Overview

Dismantled Packaging Machinery

This inventory consists of dismantled packaging machinery components, including assorted scrap metal and discarded parts. The collection features various structural elements such as sheets, frames, and piping, suitable for recycling or repurposing. These materials show signs of wear and are offered as-is for industrial salvage or scrap recovery.
