Overview

Versatile Commercial Display Solution

This compact display unit is engineered for retail environments, providing both heating and cooling capabilities to maintain products at their optimal temperature. Featuring a durable aluminum alloy inner liner and a high-performance PTC heating system, it offers reliable performance for year-round merchandising. Its efficient design makes it an ideal choice for showcasing beverages or food items that require precise climate control.

Technical Specifications

Model Number	SC-20R
Heating Temperature Range	35°C – 50°C
Voltage/Frequency	110V/60Hz, 220V/50Hz
Climate Class	N
Foaming Agent	C5H10
Inner Liner Material	Aluminum Alloy
Heating Element	PTC Heater
