

Disposable Bouffant Caps

These disposable bouffant caps are made from lightweight, breathable polypropylene non-woven fabric. They feature an elastic band for a secure and comfortable fit.

Product Overview

Professional Hygiene Protection

These disposable bouffant caps are engineered for superior hygiene in sensitive work environments. Crafted from lightweight and breathable polypropylene non-woven fabric, they ensure wearer comfort during extended shifts while maintaining rigorous sanitary standards. The secure elastic band design provides a universal fit, making them an essential solution for preventing contamination in food processing, healthcare, and cleanroom facilities.

Technical Specifications

Material	Polypropylene non-woven fabric
Key Properties	Lightweight, Breathable, Disposable

Design Features

Retention Method	Elastic band
