

Disposable Bouffant Hair Caps

Disposable bouffant caps are lightweight and breathable head covers designed to provide a hygienic barrier. Made from spunbond polypropylene (SPP) nonwoven fabric, they offer excellent particle containment and feature an elastic band for a secure fit.

Product Overview

Professional Hygiene Protection

These disposable bouffant caps are designed as a lightweight and breathable head covering, providing an essential hygienic barrier for professional environments. Constructed from spunbond polypropylene (SPP) nonwoven fabric, they ensure effective particle containment while maintaining user comfort during extended wear. Each cap features a secure elastic band designed for a snug, reliable fit that prevents hair contamination in sensitive workspaces.
