Product Overview

Professional Isolation Protection

These disposable isolation gowns are engineered for high-performance barrier protection in medical and healthcare environments. Constructed from high-quality PET composite fabric, they offer a reliable shield against fluid and particulate transfer while maintaining breathability for user comfort. Designed with safety in mind, these gowns meet rigorous international standards for liquid barrier performance, ensuring they are suitable for clinical settings where cross-contamination prevention is critical.

Technical Specifications

Material	PET composite fabric
Basis Weight	65 g/m ²
Water Penetration	>500cm H ₂ O
Impact Penetration	Negligible

Compliance & Standards

Performance Metrics

1.75 KPa

Hydrostatic Pressure Resistance

Regulatory Standards	EN 14126:2003+AC:2004, ANSI/AAMI PB70 Level 1, ANSI/AAMI PB70 Level 2
