Overview

High-Quality Disposable Protection

These disposable non-woven face masks are designed to provide a reliable barrier against airborne particles, droplets, and harmful gases in public spaces. Featuring a three-layer construction with a dedicated filter material, they offer both effective filtration and comfortable breathability. The adjustable nose clip and elastic ear loops ensure a secure, personalized fit for various face shapes.

Technical Specifications

Product Classification

Class I • Flat Ear-Type

Dimensions	17.5cm × 9.5cm
Executive Standard	GB / T32610-2016

Materials & Construction

Automated production line ensuring consistent quality and hygiene standards for non-woven protective masks.
