

Disposable Protective Isolation Suit

This disposable isolation suit is made from lightweight SMS non-woven fabric. It offers water-proof, anti-static, breathable, and dust-proof protection in a one-piece design.

Product Overview

Disposable Protective Isolation Suit

This disposable isolation clothing is designed to provide a reliable protective barrier against particulate matter and liquid splashes. Constructed from lightweight, breathable, and non-woven material, it minimizes heat stress while ensuring user comfort and mobility. The suit features a full-body coverage design with a hood, elastic wrists, and ankles for a secure fit, making it suitable for healthcare, laboratory, and industrial environments.
