Product Overview

Professional Protection

This disposable surgical face mask is engineered for reliable single-use protection against airborne particles and fluid droplets. Constructed with a multi-layer non-woven fabric design, it balances effective filtration efficiency with essential breathability for extended wear. The inclusion of elastic ear loops and an adjustable nose clip ensures a secure, comfortable seal suitable for medical, dental, and general hygiene environments.

Compliance & Standards

Certification Standard

YY 0469

Design Features

Key Features
