

Disposable Surgical Face Mask

This disposable surgical face mask is designed for single-use in medical settings. The mask is constructed from non-woven materials and filter paper.

ADDITIONAL IMAGES

Product Overview

Professional Grade Surgical Protection

These disposable surgical face masks are designed for clinical medical personnel during invasive operations, providing a reliable barrier against airborne particles and droplets. Featuring a multi-layer construction with high-quality filter paper and non-woven fabrics, they offer high filtration efficiency without compromising breathability. The masks are designed for comfort with adjustable nose clips and elastic ear loops to ensure a secure fit for extended use.

Technical Specifications

Automated production line ensuring high-volume supply and hygienic manufacturing standards.

Available Models

- Rectangle
- Ship shape
- Arch

Material Composition

Non-woven Fabric, Filter Paper

Executive Standard

YY / 0469-2011

Application Scope

Clinical medical personnel during invasive operations
