

Distribution Fuse Link

Distribution fuse links are accessories for outdoor expulsion drop-out type distribution fuse cutouts. They protect power systems from overload and short-circuit failure.

Product Overview

Reliable Overcurrent Protection

These distribution fuse links serve as essential accessories for outdoor expulsion drop-out type distribution fuse cutouts. Designed to protect power systems from over-load and short-circuit failure, they ensure consistent performance and high mechanical strength. Built to meet international standards, these components provide high over-current protection capabilities for industrial, commercial, and residential electrical systems.

Technical Specifications

Voltage Ratings	11kV - 36kV
Standards	IEC 600282-2

Performance Features

Key Features

- High over-current protection capability
- High breaking current capacity
- High industrial frequency withstand voltage
- High mechanical strength
- Strict quality control and testing

Logistics & Ordering

Shipping Options

Sea • Air • Express

Standard Packaging	25 pcs per carton (lined with foam), packed together on a pallet
Regular Delivery Time	15 days
Payment Terms	T/T, L/C
