

Distributor Cap for Ignition Systems

This distributor cap is designed for optimal ignition system performance. It is constructed from heat-resistant materials to withstand extreme engine conditions.

Product Overview

High-Performance Ignition Component

This distributor cap is engineered for optimal ignition system performance, ensuring reliable spark delivery and enhanced engine efficiency. Constructed from durable, heat-resistant materials, it is designed to withstand extreme engine conditions and prevent misfires. As a direct replacement part, it allows for easy installation and consistent ignition timing.

Technical Details

OEM Reference	F220-18-V05
Material Characteristics	Heat-Resistant, Durable

Key Features

Performance Benefits

- Precision-engineered terminals
- Reliable spark delivery
- Enhanced engine efficiency
- Consistent ignition timing
- Misfire reduction
