

Diving Knife with Serrated Edge and Sheath

This diving knife features a stainless steel blade with a partially serrated edge and a pointed tip. It comes with a durable plastic sheath and a rubber strap for attaching to diving gear.

Product Overview

Professional Diving Knife

This high-quality diving knife is engineered for reliability and performance in underwater environments. Featuring a stainless steel blade with a partially serrated edge, it provides excellent cutting power for lines, ropes, and various underwater materials. The durable, textured green handle ensures a secure grip, while the included sheath with a locking mechanism offers safe storage and quick access during dives.
