

DLLA160P50 Common Rail Fuel Injector Nozzle

This common rail fuel injector nozzle is designed for Cummins engines and Denso fuel injection systems. The nozzle ensures optimal fuel atomization for efficient combustion, improving engine performance and reducing emissions.

Product Overview

High-Precision Fuel Injection Solution

The DLLA160P50 Common Rail Fuel Injector Nozzle is engineered for high-performance diesel applications, ensuring optimal fuel atomization and efficient combustion. Manufactured from durable steel, this component is designed to enhance engine performance while reducing emissions and improving overall fuel economy. It adheres to strict quality standards, providing a reliable alternative for professional diesel engine maintenance.

Technical Specifications

Body Material	Steel
Weight	0.04 kg
Carburettor Type	Downdraft
Compatible Fuel	Diesel

Compliance & Warranty

Certifications	ISO9001, TS16949
Warranty	6 Months
HS Code	84099199

Reference Data

Cross-Reference Compatibility

Item Type	Reference No.	Stumping No.
Injector Nozzle P	093400-5500	DLLA160P50
Injector Nozzle S	0 433 271 376	DLLA149S774
Injector Nozzle S	0 433 271 046	DLLA150S187
Injector Nozzle S	0 433 271 299	DLLA150S616
