

DMB-T Digital Terrestrial Television Modulator

This professional modulator is designed for digital terrestrial television broadcasting. It supports the DMB-T modulation standard and offers high performance and reliability.

Product Overview

Professional DMB-T Broadcasting Solution

This professional-grade modulator is engineered specifically for digital terrestrial television broadcasting applications. Designed for high performance and reliability, it seamlessly integrates into existing infrastructure while supporting the DMB-T modulation standard. The unit includes comprehensive monitoring and control capabilities, ensuring real-time status tracking for mission-critical broadcasting environments.

Technical Features

Monitoring Functions

- Real-time working status monitoring
- Comprehensive control interface
- TS overflow detection
- GPS status tracking (OK/PPS/ERR)

Modulation Standard	DMB-T
----------------------------	-------

Interface & Control

Connectivity

- ASI Input
- RF Monitor Output
- I Monitor Output

Front Panel Indicators	Power, Main, GPS OK, GPS PPS, GPS ERR, ASI, Lock, TS Overflow
