Product Overview

Professional Communication Solution

This DMR Tier III trunking portable radio is engineered for high-efficiency, secure communication in demanding professional environments. It features advanced full-duplex calling technology and automatic roaming capabilities to ensure seamless connectivity across wide-area networks. With a rugged, IP68-rated design and long-lasting battery life, it provides reliable performance for public safety, transportation, and industrial operations.

Technical Specifications

Trunking Protocol	DMR Tier III
Audio Technology	Full Duplex, Noise Suppression, High Audio Clarity
Call Management	Priority-Based Interruption

Power & Battery

Operating Time

17 hours
Trunking Mode

Battery Capacity	3400 mAh
------------------	----------

Durability & Environment

Ingress Protection
IP68

Advanced Features

Network Connectivity

- Automatic Roaming
- Dynamic Channel Allocation
- DMR Tier III Compatibility

GPS Positioning

Yes
