

DMX 3-in-1 LED Square Flood Light

This high-intensity flood light offers dynamic color illumination via DMX control. An adjustable mounting bracket and robust aluminum housing allow for versatile installation in demanding environments.

Overview

High-Performance Dynamic Lighting

The DMX 3-in-1 LED Square Flood Light is a versatile solution designed for high-intensity architectural and stage lighting applications. Featuring advanced 3-in-1 LED technology, it provides vibrant color mixing and dynamic illumination controlled via DMX. Its robust construction and adjustable mounting make it an ideal choice for professional outdoor installations requiring both durability and precision.
