

# Document Scanner for Paper Digitization

This high-speed document scanner is designed for efficient digitization of paper documents. It features automatic document feeding and duplex scanning capabilities for quick processing of large volumes of paperwork.

## Product Overview

### High-Efficiency Document Digitization

This high-speed document scanner is engineered for the efficient digitization of large volumes of paper documents. Featuring advanced automatic document feeding and duplex scanning capabilities, it is designed to streamline workflows in professional office environments. Its robust construction ensures reliable, high-throughput performance for demanding daily scanning tasks.

## Performance Metrics

### Suitable Environments

Professional Office • High-Throughput Environments

### Scanning Capabilities

Automatic Document Feeding, Duplex Scanning
