

# Dog Agility Tunnel

This dog agility tunnel is designed for outdoor play and training. It is constructed from durable, reinforced material and features a collapsible design for easy storage.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Agility Tunnel

This professional-grade dog agility tunnel is engineered for durability and flexibility in training environments. Constructed from fire-retardant PVC fabric reinforced with helix steel wire, it withstands demanding outdoor conditions while remaining lightweight for easy setup. The collapsible design ensures efficient storage and transportation, making it an ideal choice for agility courses.

## Material & Construction

Material Composition	PVC Fabric, Helix Steel Wire, Fire-retardant, Rubber Strip
Fabric Weight	550 g

## Performance Specs

### Operating Temperature

<b>-20 °C</b> Min Temperature	<b>80 °C</b> Max Temperature
----------------------------------	---------------------------------

### Resistance Properties

Oleic Acid Resistant • Water Resistant • Tear Retardant • Fire Retardant

## Dimensions & Customization

### Available Lengths

- 5m
- 10m
- Custom lengths available

Customization	Color and length can be customized to specific requirements
---------------	---

## Design Features

### Structural Features

- Helix steel wire support
- Rubber strip reinforcement
- Punching hanging rings
- Steel collar at both ends
- Collapsible design
