

Dome Gasket Washer

This metallic gasket washer combines a dome-shaped central component with a flat washer base. It provides a secure and sealed connection between mechanical parts.

Product Overview

Dome Gasket Washer Overview

This dome gasket washer is a precision-engineered component designed for robust sealing in industrial and mechanical applications. Combining a dome-shaped central structure with an integrated flat washer base, it ensures a secure and tight connection between mechanical parts. The durable metallic finish offers excellent resistance to wear and corrosion, making it a reliable choice for demanding environments.

Technical Specifications

Key Features

- Dome-shaped central component
- Integrated flat washer base
- Wear-resistant metallic finish
- Designed for secure sealing

Design Type	Dome-shaped gasket with integrated flat washer base
Finish	Metallic, corrosion-resistant
Applications	Industrial Machinery, Sealing Systems, Mechanical Assembly
