

DOT-4 Brake Fluid 250 ml

High-performance hydraulic fluid designed for automotive brake and clutch systems. It provides excellent protection against corrosion and wear, ensuring reliable braking performance under extreme conditions.

Product Overview

High-Performance Hydraulic Fluid

This Extra Heavy Duty DOT-4 brake fluid is a high-performance hydraulic solution engineered for automotive brake and clutch systems. It provides exceptional protection against corrosion and wear, ensuring consistent and reliable braking performance even under extreme operating conditions. Designed with superior thermal stability, this fluid offers excellent resistance to vapor lock for optimal safety and efficiency.

Technical Specifications

Fluid Classification

DOT-4 • Heavy Duty

Volume

250 ml

Model Identifier

M6017

Performance Features

Key Performance Benefits

- Excellent corrosion protection
- Superior wear resistance
- High thermal stability
- Vapor lock resistance

Application

Automotive Brake Systems, Clutch Systems
