

Dot Matrix Impact Printer

This dot matrix printer is designed for printing multipart forms and continuous paper. It features a wide carriage and impact printing mechanism, compatible with various paper types.

Product Overview

Industrial Impact Printing

This dot matrix impact printer is engineered for heavy-duty environments requiring reliable and durable output. It features a wide carriage design that supports multipart forms and continuous paper handling, making it an ideal solution for logistics, administrative tasks, and specialized documentation workflows. Its impact printing mechanism ensures consistent performance across long print runs.

Technical Specifications

Printing Technology	Dot Matrix Impact
Carriage	Wide Carriage

Paper Handling

Supported Media	Multipart Forms, Continuous Paper
-----------------	-----------------------------------

Key Features

Ideal Environments

Logistics • Durable Printing • High-Volume Forms
