

Dot Matrix LED Display Module

This dot matrix LED display module is designed for creating dynamic visual displays. It supports both single and double color configurations and utilizes F3.0 LEDs for enhanced brightness and clarity.

Product Overview

High-Performance Dot Matrix Display

This dot matrix LED display module is designed for creating dynamic visual displays, supporting versatile text, graphics, and animation applications. Engineered with a 4mm pixel pitch and 64x32 pixel resolution, it delivers clear imagery suitable for various electronic information products. The module is built for efficiency and clarity, making it a reliable component for professional display integration.

Technical Specifications

Brightness

300 cd/sqm
Brightness

Module Size	256 x 128 mm
Pixel Pitch	4 mm
Panel Pixels	64 x 32
Pixel Density	62500
LED Arrangement	1R

Certifications

Compliance

CE • RoHS • CCC
