Product Overview

High-Performance Garbage Truck Hydraulic Solutions

This double-acting hydraulic cylinder is specifically engineered for the demanding environments of waste management and garbage truck operations. Featuring a robust clevis mount design, it provides controlled movement in both directions to enhance operational efficiency during lifting and dumping. Our manufacturing process focuses on precision engineering and durability to ensure long-term reliability and minimal maintenance costs.

Technical Configuration

Acting Type

Double-Acting

Mounting Style

Clevis Mount

Customization & Manufacturing

Production Standards

- Strict adherence to customer drawings
- Production based on provided samples
- Custom configurations available

Application & Performance

Operational Features

2 Way

Directions of Control

Primary Application

Garbage Truck Lifting and Dumping

Key Performance Benefits

Heavy-Duty, Precision Engineered, Controlled Movement, High Durability
