

Double Bevel Cutting Edge for Earthmoving Equipment

This ground engaging tool is a double bevel cutting edge. It is manufactured for extended wear life and optimal performance.

Overview

High-Performance Cutting Edges

These double bevel cutting edges are engineered for heavy-duty earthmoving, mining, and construction equipment. Manufactured from durable, wear-resistant materials, they are designed to withstand abrasive conditions while providing precise cutting and grading capabilities. This versatile range of replacement parts supports various machinery types, including excavators, backhoe loaders, bulldozers, and scrapers.

Compatibility & Applications

Suitable For

Excavators, Backhoe Loaders, Bulldozers, Compactors, Loaders, Scrapers, Mining, Construction, Road Maintenance
