

Double Bevel Cutting Edge for Earthmoving Machinery

This double bevel cutting edge is a wear-resistant component for earthmoving machinery. Its double bevel design allows for reversible use, which maximizes its lifespan and reduces downtime.

Product Overview

Heavy-Duty Double Bevel Cutting Edges

These double bevel cutting edges are essential ground engaging tools engineered for high-performance in earthmoving, mining, and construction environments. Designed for durability and longevity, they provide superior wear resistance during grading, leveling, and material handling operations. The reversible double bevel design optimizes service life, significantly reducing machine downtime and maintenance costs.

Compatibility

Compatible Machinery

Excavators, Backhoe Loaders, Bulldozers, Compactors, Loaders, Scrapers

Product Range

Common Part Specifications

Part Number	Dimensions (L x W x T)	Hole Size
6Y5540	803 x 330 x 30 mm	1"
4T6659	1052 x 203 x 19 mm	3/4"
4T3009	1520 x 203 x 19 mm	3/4"
9W1878	1227 x 254 x 19 mm	3/4"
1U0593	1319 x 360 x 30 mm	1-1/4"
1U0762	1406 x 406 x 35 mm	1-1/4"
7T5702	1787 x 330 x 35 mm	1"
9W6656	992 x 406 x 45 mm	1-1/4"

Additional Offerings

Other Available Wear Parts

- Bucket teeth and adapters
- Ripper shanks and points
- Grader blades and end bits
- Chocky bars
- Wear buttons and blocks
