

# Double Bowl Slush Machine with Electronic Temperature Control

This double bowl slush machine dispenses frozen beverages with high efficiency. It features electronic temperature controls and food-grade, high-density construction for safety and durability.

## ADDITIONAL IMAGES

## Product Overview

### Versatile Commercial Frozen Beverage Dispenser

This double bowl slush machine is designed for high-performance commercial use, capable of producing ice slush, smoothies, and milkshakes. Featuring advanced electronic temperature control and high-intensity stirring, it ensures a consistent and exquisite texture for all beverages. The durable, energy-efficient design operates at low noise levels, making it an ideal addition for restaurants, cafes, and bars.

## Technical Specifications

Noise Level	55 dB
Bowl Configuration	Dual independent bowls
Key Features	Electronic Temperature Control, High-Intensity Stirring, Energy-Saving Compressor, Easy-to-clean

## Performance

### Operational Efficiency

**55 dB**

Max Noise Output

## Maintenance

### Care and Maintenance

- Food grade high density bowls
- Humanized design for easy cleaning
- Integrated drip tray for condensation management
