

Double Chamber Vacuum Packaging Machine

This double chamber vacuum packaging machine is designed for efficient packaging of food products. It utilizes a vacuum to remove air from the packaging, preserving the contents and extending shelf life.

Product Overview

Professional Vacuum Packaging Solution

This double chamber vacuum packaging machine is designed for efficient, high-volume sealing of various products including liquids, pastes, and solids. Built with high-strength 304 stainless steel, it meets strict food hygiene standards while offering moisture-proof and waterproof performance for easy cleaning. The advanced micro-computer controller ensures precise operation, helping to extend shelf life by preventing oxidation and bacterial growth.

Key Features

Advantages

Waterproof and Moisture-proof, 304 Stainless Steel Construction, Tilt Table Design, Micro-computer Controlled, Low Failure Rate

Technical Specifications

Model Comparison

Specification	DTDZ400B/2	DTDZ500B/2	DTDZ600B/2
Power (kW)	0.75	1.5	1.5
Displacement (m3/h)	20	2x20	2x20
Weight (kg)	200	270	380

Work Cycle Time

15 sec

Min Time

40 sec

Max Time

Compatibility

Compatible Materials

- Plastic composite film
- Aluminum foil composite film

Industries Served

Food & Beverage, Pharmaceuticals, Electronics, Chemicals, Military Supplies
