Overview

High-Efficiency Double Chamber Vacuum Packaging

This industrial-grade vacuum packaging machine is designed for high-throughput environments across the food processing, pharmaceutical, and electronics sectors. Featuring a robust double-chamber design, it allows for continuous operation to maximize productivity while ensuring airtight seals for extended product shelf life. The stainless steel construction ensures long-term durability and meets strict hygiene standards required for professional use.

Key Features

Core Capabilities

2

Vacuum Chambers

Mobility

Yes

Construction & Design

Build Material	Stainless Steel
Mounting Type	Casters/Wheels for easy mobility
Monitoring	Transparent lid for process monitoring

Operation & Control

Adjustable Settings

- Vacuum time
- Sealing parameters
- Sealing time

Control Panel

Digital control panel for precise adjustments

Applications

Target Industries

Food Processing, Pharmaceuticals, Electronics, Commercial Packaging, Industrial Preservation

Compliance

Certifications

CE
