

Double Conversion Online Uninterruptible Power Supply (UPS)

This online UPS provides reliable power protection for critical equipment. Featuring double-conversion technology, it ensures a stable and clean power supply, isolating connected devices from voltage fluctuations, frequency variations, and power outages.

Overview

Reliable Power Protection

The KR31 series Online UPS provides robust power protection for critical equipment using advanced double-conversion technology. It ensures a stable, clean power supply by isolating connected devices from voltage fluctuations, frequency variations, and unexpected power outages. With its high power factor and intelligent battery management, this unit is designed to maximize efficiency and extend battery lifespan in demanding environments.
