

# Double-Deck Diamond Slotting Saw Blade

This diamond saw blade features a double-deck configuration for slotting applications. It is constructed with diamond abrasive for efficient cutting of hard materials.

## ADDITIONAL IMAGES

## Product Overview

### Precision Slotting Performance

This double-deck diamond slotting saw blade is engineered for high-efficiency cutting in demanding industrial environments. Featuring a robust steel core and advanced diamond abrasive segments, it is optimized for precise material removal in concrete, stone, and masonry. The specialized double-deck configuration significantly enhances cutting speed while minimizing vibration for cleaner, more professional results.

## Technical Specifications

### Compatible Materials

- Marble
- Concrete
- Granite
- Masonry

### Blade Design

Double-Deck • Tuck Point • Super Thin Turbo

### Manufacturing Technology

Cold Press, Hot Press

## Compliance and Standards

### Quality Standards

MPA Hannover
