Overview

Professional High-Access Solution

This double-deck suspended platform is engineered for efficient high-rise construction, maintenance, and facade work. Its robust steel frame and dual-level design provide increased workspace, allowing multiple workers to operate safely and efficiently at elevation. Equipped with advanced safety mechanisms including electric hoists, safety locks, and emergency stops, this system is designed for reliability in demanding environments.

Technical Specifications

Rated Load Capacity

350 kg

Load Capacity

Maximum Platform Length

16 m

Compliance & Certification

Certifications

CE • SII

Design & Features

Key Features

- Double-deck design for increased workspace
- Robust steel frame construction
- Electric hoists for vertical movement
- Modular design for easy assembly
- Safety locks and emergency stop mechanisms

Applications

Suitable Applications

Facade Work, Window Cleaning, High-rise Maintenance, Construction, Renovation
