

Double Door Beverage Refrigerator

This beverage refrigerator uses a compressor and fan for cooling and features mechanical control with an adjustable thermostat. It has self-closing stainless steel swing doors, a stainless steel handle, interior fluorescent light, and height-adjustable feet.

Product Overview

Professional Beverage Display Solution

This double door beverage refrigerator is engineered for optimal storage and high-visibility display of beers, wines, and assorted drinks. Featuring a durable stainless steel frame and double-paned glass doors, it provides both insulation and a professional aesthetic. The unit integrates a compressor-based cooling system with a digital thermostat, ensuring precise temperature management for commercial or residential environments.
