

Double Door Pharmacy Refrigerator for Medical Storage

This double-door medical freezer is designed for storing temperature-sensitive materials. It features a digital temperature display, adjustable shelves, and transparent glass doors.

Overview

Professional Medical Storage Solution

This double-door pharmacy refrigerator is designed for precise temperature control, maintaining a steady range of 2-8°C suitable for medical and laboratory storage. It features a transparent two-layer glass door design for easy inventory management and includes an integrated locking mechanism for security. With a robust design and quiet operation, it is an ideal solution for pharmacies, hospitals, and research facilities.

Performance

Temperature Range
