

Double Door Upright Display Freezer

This double-door upright freezer is designed for commercial use. It features glass doors for product visibility and internal shelving for organized storage.

Product Overview

Professional Display Freezer

This double-door upright display freezer is engineered for commercial environments, featuring a robust anti-corrosion steel body designed to withstand tropical climate conditions. With a generous 70mm insulation layer and an advanced cooling system, it ensures optimal temperature stability for your frozen goods. The unit is equipped with practical features like internal shelving, adjustable controls, and pest-resistant construction to provide a reliable, long-term storage solution.

Technical Specifications

Rated Voltage	220-240V
Frequency	50 Hz
Supported Refrigerants	R134a, R600a
